

# Business Entry Policy

**To our world of customers....**

**I don't care about your skin colour.**

**I don't care about your ethnicity, your educational background, your career choice or your financial status.**

**I don't care what you look like.**

**Whatever your ancestors may or may not have done or experienced in the distant or more recent past is irrelevant for my evaluation of you.**

**If I judge you it will only be in response to your behaviour as a unique individual**

**A cooperative spirit, civility, self responsibility, honesty, a genuine friendly demeanour together with enthusiasm for learning and reason, embracing the present and looking ahead to the future, will get you far in this place and will be your best chance for advancing in Life.**
